THE SECRETARIAT OF NATIONAL COALITION OF CIVIL SOCIETY ORGANIZATIONS

BACKDROP

In India the civil society organizations have been experimenting and developing various community participation models but mostly its spread has been limited and operations remained in silos because of lack of platforms and alliances to highlight their works. Therefore, Oxfam India has set a national coalition for civil society organizations from 15 states in the country to bring certain macro-level changes that can help to achieve the envisaged health, nutrition and women's economic empowerment outcomes through a common platform. It is believed that this platform will give a collective voice to the people and has the capacity to negotiate and influence the state for the necessary integration of health, nutrition and gender under the government flagship programmes like NRLM, NHM, ICDS and others. Oxfam India acts as an interim Secretariat for this coalition at the national level to provide necessary support for its effective functioning. As the thematic areas of work of this coalition are being looked through the lens of gender discrimination and social inclusion, emphasis is being given on Dalits, Adivasis and Muslims communities.

As evidence generation is one of the key strategies for functioning of this coalition, Oxfam India intended to develop a state factsheet for each of the target states to highlight health, nutrition and women empowerment related issues of the state.

Only the important indicators related to health, nutrition and women empowerment have been included in this factsheet and presentation of segregated data is limited to only locations (rural & urban), caste categories (SC, ST, OBC & Others) and religious groups (Hindus & Muslims). As data for other religious categories are not available for all indicators for all sources, only two religious groups have been considered for the present analysis.

- 70% of the state's population lives in rural areas.
- Uttarakhand's decadal population growth rate only 1 point more than India.
- Sex ratio in urban area and child sex ratio in both rural and urban areas are matters of concern in the state.
- The state stands at fifth position from bottom in health index rank.
- State has low female literacy rate compared to male literacy with 30% of its women not knowing how to read and write.

WOMEN 15-19 YEARS WHO WERE ALREADY MOTHERS OR PREGNANT (%)

INDIA **7.9**

STATE **2.9**

Source: NFHS 2015-2016

- Prevalence of early marriage and teenage pregnancy is somewhat less in the state when it is compared with national figure.
- The state records almost same rate of TFR in comparison to the national total with Muslims recording the maximum (3%).

MORTALITY

MORTALITY RATES (DEATHS PER 1000 LIVE BIRTHS)

MATERNAL MORTALITY RATE (MMR) (DEATHS PER 100,000 LIVE BIRTHS)

CURRENTLY MARRIED WOMEN AGED 15-49 WITH UNMET NEED * FOR FAMILY PLANNING (%)

* Unmet need for family planning is defined as the percentage of currently married women who either want to space their next birth or stop childbearing entirely, but are not using contraception.

- While there is no much difference between state and national figures of different child mortality rates, the proportion is quite higher among Muslims and OBC communities.
- Maternal mortality rates in Uttarakhand is much lower in comparison to national average. There is a sharp decline in maternal mortality rate of the state since 2014-16.
- Prevalence of high unmet need among Muslim women in the state signifies the poor access to contraceptive measures.

MATERNAL CARE

MOTHERS WHO HAD AT LEAST 4 ANTENATAL CARE VISITS (%)

Source: NFHS 2015-2016

MOTHERS WHO CONSUMED IFA FOR 100 DAYS OR MORE WHEN THEY WERE PREGNANT (%)

Source: NFHS 2015-2016

MOTHERS WHO RECEIVED POSTNATAL CARE FROM ANY SKILLED HEALTH PERSONNEL WITHIN 2 DAYS OF DELIVERY (%)

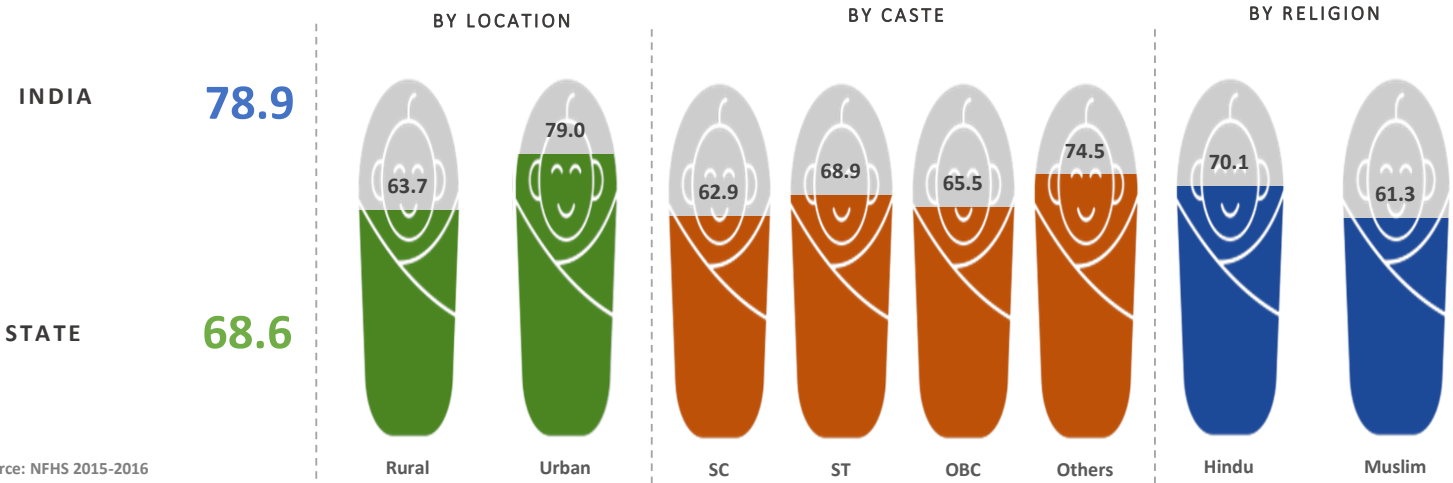

Source: NFHS 2015-2016

- The state shows low utilization of both antenatal and postnatal care services among all women with lower proportion of women belong to Scheduled Tribe and Muslim communities.
- The state records extreme low consumption rate of IFA tablets during pregnancy, with lowest among Muslims (14%) compared to other social and religious communities.

58.5

STATE

54.9

Source: NFHS 2015-2016

- The percentage of underweight, stunted and wasted children in the state is slightly lower than the national average. No much difference is observed between the population belong to different social and religious categories in this case.

DIETARY DIVERSITY PATTERN

6-23 MONTHS CHILDREN FED 4+ FOOD GROUPS IN PAST 24 HOURS (%)

6-23 MONTHS CHILDREN FED MINIMUM MEAL FREQUENCY IN PAST 24 HOURS (%)

- Only around 20% and 40% of state's children consume meals having 4 or more food groups and minimum meal frequency respectively. The proportion of these children is lower among Muslims in comparison to other social and religious categories.

NUTRITIONAL STATUS OF WOMEN AND MEN

WOMEN WHOSE BODY MASS INDEX IS BELOW NORMAL (BMI < 18.5 KG/M²) (%)

WOMEN WHO ARE OVERWEIGHT OR OBESE (BMI ≥ 25.0 KG/M²) (%)

WOMEN AND MEN AGED 15-49 YEARS WHO ARE ANAEMIC (%)

PREGNANT WOMEN AGED 15-49 YEARS WHO ARE ANAEMIC (<11.0 G/DL) (%)

BY CASTE

BY RELIGION

- Comparatively higher proportion of women with below normal Body Mass Index (BMI) are noticed in rural areas and among scheduled caste communities.
- Anaemia is a concern among both pregnant and non-pregnant women in state, however the percentage is lower than the national figure.

MENSTRUAL HYGIENE

AVERAGE OUT OF POCKET EXPENDITURE PER DELIVERY IN PUBLIC, PRIVATE AND ANY HEALTH FACILITY (RUPEES)

Source: NFHS 2015-2016

- Government share in health expenditure is only 37% in the state, however it is higher than the percentage at national level.
- With low government share in health expenditure, the state shows higher out of pocket expenditure (61%) for health care. Moreover, while average out of pocket expenditure for delivery in public health facilities is above Rs. 2500/- in the state, it is approximately Rs. 3000/- for Muslims and people belong to other backward castes.

GOVERNMENT FLAGSHIP PROGRAMMES FOR HEALTH AND NUTRITION

NATIONAL HEALTH MISSION

The National Health Mission (NHM) encompasses its two Sub-Missions, the National Rural Health Mission (NRHM) and the National Urban Health Mission (NUHM). The main programmatic components include Health System Strengthening, Reproductive-Maternal- Neonatal-Child and Adolescent Health (RMNCH+A), and Communicable and Non-Communicable Diseases. The NHM envisages achievement of universal access to equitable, affordable & quality health care services that are accountable and responsive to people's needs.

NHM has six financing components:

- (i) NRHM-RCH Flexipool,
- (ii) NUHM Flexipool,
- (iii) Flexible pool for Communicable disease,
- (iv) Flexible pool for Non communicable disease including Injury and Trauma,
- (v) Infrastructure Maintenance and
- (vi) Family Welfare Central Sector component.

INTEGRATED CHILD DEVELOPMENT

Integrated Child Development Services (ICDS) Scheme is one of the flagship programmes of the Government of India and represents one of the world's largest and unique programmes for early childhood care and development.

The beneficiaries under the Scheme are children in the age group of 0-6 years, pregnant women and lactating mothers. Objectives of the Scheme are:

1. To improve the nutritional and health status of children in the age-group 0-6 years;
2. To lay the foundation for proper psychological, physical and social development of the child;
3. To reduce the incidence of mortality, morbidity, malnutrition and school dropout;
4. To achieve effective co-ordination of policy and implementation amongst the various departments to promote child development;
5. To enhance the capability of the mother to look after the normal health and nutritional needs of the child through proper nutrition and health education.

POSHAN ABHIYAAN

The Prime Minister's Overarching Scheme for Holistic Nutrition (POSHAN) Abhiyaan or National Nutrition Mission is one of the India's flagship programmes to improve nutritional outcomes for children, adolescents, pregnant women and lactating mothers by leveraging technology, a targeted approach and convergence. It aims to build a people's movement (Jan Andolan) around malnutrition.

Key Strategies

For implementation of POSHAN Abhiyaan the mission adopts a four point strategy:

1. Inter-sectoral convergence for better service delivery
 2. Use of technology (ICT) for real time growth monitoring and tracking of women and children
 3. Intensified health and nutrition services for the first 1000 days
- Jan Andolan

SHORTFALL IN HEALTH FACILITIES IN RURAL AREAS (%)

Note: For India 'No Service' is available.

Source: NFHS 2015-16

- The state performs well in establishing rural health infrastructure, as there is no shortage in health care facilities in rural areas at any level. But in contrast, there is a huge shortfall in some healthcare human resources, particularly specialists at the CHC level and ANMs at PHC level.
- Out of total operational AWCs, above 2000 AWCs are not currently providing services. There are only 2 nutritional rehabilitation centres (NRCs) in the state as per data available.
- Near about half of the women and children of the state children do not receive their entitled services like nutritious food etc. from AWC.

- There has been an increase, with almost double in numbers, in crime against women in the state since 2014. But the state stands at the 11th position from the bottom in the country while ranking the crime rate against women in 2016.

GOVERNMENT FLAGSHIP PROGRAMMES FOR WOMEN EMPOWERMENT

NATIONAL RURAL LIVELIHOOD MISSION

What is NRLM

Govt. of India established National Rural Livelihoods Mission (NRLM) in June 2010 to implement the new strategy of poverty alleviation woven around community based institutions.

Mission's primary objective is to reduce poverty by promoting diversified and gainful self-employment and wage employment opportunities for sustainable increase in incomes.

To achieve the desired goal of the mission, NRLM provides a combination of financial resource and technical assistance to states such that they could use the comprehensive livelihoods approach encompassing four inter-related tasks. These tasks are:

1. Mobilizing all rural, poor households into effective self-help groups (SHGs) and their federations;
2. Enhancing access of the rural poor to credit and other financial, technical and marketing services;
3. Building capacities and skills of the poor **for gainful and sustainable livelihoods; and**
4. Improving the delivery of social and economic support services to the poor.

BETI BACHAO BETI PADHAO

Beti Bachao, Beti Padhao is a campaign of the Government of India that aims to generate awareness and improve the efficiency of welfare services intended for girls in India.

The Overall Goal of the Beti Bachao Beti Padhao (BBBP) Scheme is to celebrate the girl child and enable her education. The objectives of the Scheme are as under:

- i. To prevent gender biased sex selective elimination
- ii. To ensure survival and protection of the girl child
- iii. To ensure education and participation of the girl child

Strategies employed to successfully carry out the scheme are:

1. Implement a sustained social mobilization and communication campaign to create equal value for the girl child and promote her education.
2. Place the issue of decline in child sex ratio/sex ratio at birth in public discourse, improvement of which would be an indicator for good governance.
3. Focus on gender critical districts and cities.
